DETAILED ACTION

This Office Action is in response to the Applicant's application filed November 20, 2003.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: elements 61, 62, and 63 in Fig. 5. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-7 are allowable over the art of record because the prior art does not teach or suggest a radiation image taking apparatus having the photo timer unit detachably attachable to the case or the grid unit attached to the photo timer and to the case.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zur et al. (US 2002/0090055) discloses a bucky device with a removable anti-scatter grid and an automatic exposure control device that may be integrated within image detection module. Jenkins et al. (4,457,010) discloses an apparatus for holding x-ray cassettes and grids. However, the prior art does not teach or suggest a detachably attachable automatic exposure control device to the case that contains the radiation detecting unit.

This application is in condition for allowance except for the following formal matters: as set fourth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
